Tel:571 96 31 80
Legal Address: Zestafoni,kvaliti, Kekelidzis 5
Residential Address: Tbilisi,D.Sarajishvili 16a

About me

I am a **Software Engineer** focused on **Full-Stack Development**. I have experience building real-world projects and teaching different aspects of software development.

- Worked with multiple companies, building both **frontend** and **backend** solutions using the JavaScript and TypeScript ecosystem.

Technical Skills

- **Frontend:** HTML, CSS, JavaScript, Typescript, React, Next.js, Tailwind CSS.
- **Backend:** Node.js, Express.js, Nest.js.
- **Databases:** MongoDB, PostgreSQL.

EXPERIENCE

Front-End Developer @re:educate
September2025 – Present

I was offered a Frontend Developer position before completing my course as a result of my demonstrated technical skills and strong work ethic. Since then, I have been actively working on real client-commissioned projects, building user-focused interfaces and translating designs into high-quality, functional web applications. I collaborate closely with team members and contribute across all stages of development, from planning and implementation to final delivery,while continuously improving my technical expertise and adapting to project requirements.

Full-Stack Teaching Assistant @re:educate
October 2025 - present

I currently work as a Teaching Assistant in **Reeducate**'s 10-month acceleration program, where I actively support students throughout their learning journey by helping them solve technical challenges and successfully complete practical assignments. I provide guidance in both Frontend technologies (**HTML, CSS, JavaScript, React, Next.js**) and Backend development (**Express.js, NestJS, MongoDB, PostgreSQL**). In parallel, I continuously develop the professional and communication

skills required for teaching, enabling me to deliver knowledge more effectively and contribute to my students' overall progress.

Back-End Teaching Assistant @re:school
December 2025 – Present

I work as a Backend Teaching Assistant, supporting children aged 12–16 in learning foundational programming skills, including **Express.js**, **MongoDB**, and **PostgreSQL**. I am actively involved in reviewing their assignments and guiding them through the coding process, ensuring proper practices are followed and helping them solve technical challenges, which contributes to their fast and effective skill development.

Full-Stack Developer @tamarieli
 November 2025 - Present

Tamarieli is an association that supports emigrants, engages in charitable activities in France, and promotes Georgian traditions and art. Since developing the association's website using **React.js, Next.js, TypeScript, Express.js, and MongoDB**, I have continued to provide technical support, constantly updating the platform, adding new features, and working on overall site improvements.

React/NextJS Mentor @UniLab
October 2025 - present

- **Technical Leadership:** Leading the frontend development process, defining project architecture, and ensuring high-quality output through rigorous **Code Reviews** and technical guidance.
- **Cross-functional Collaboration:** Partnering with UI/UX designers and Project Managers (PMs) during the planning phase to conduct **Task Estimation**, define technical requirements, and make strategic development decisions.
- **Mentorship & Team Management:** Facilitating the growth of acceleration program participants by resolving complex technical roadblocks and enforcing best practices such as **Clean Code** and **Performance Optimization**.
- **Recruitment & Selection:** Actively involved in the admission process for new cohorts, conducting technical assessments and evaluating candidate potential.

Full-Stack Developer @Sellvio
September 2025 - present

Sellvio is an emerging startup that enables individuals to monetize UGC (User-Generated Content). The platform connects businesses and creators in a single workspace: businesses post campaigns, which creators can then accept, initiating a chat for further negotiations. I served as a Frontend Developer at the company, working with **React.js, Nextjs,TypeScript,Nestjs,PostgreSQL**.

Full-Stack Developer @UniLab
May 2025 - October 2025

Unilab is a cyber-laboratory at Ilia State University that hosts an acceleration program designed to simulate a real-world corporate environment. During my internship, I worked on production-level projects using **React.js, Next.js, and TypeScript,ExpressJs,MongoDB**. This experience served as

a cornerstone of my career, allowing me to dive into real-world applications and translate my theoretical knowledge into professional practice.

EDUCATION

November 2023- present
Water and Soil Resources Engineering - [Georgian Technical University](#)

November 2024 - December 2025
Web Development - [re:educate](#)

August 2025 - October 2025
Digital Product Testing & QA (GITA) - [Tbilisi School of Communication](#)
